

EARTH ENVIRONMETAL & GEOTECHNICAL LTD

STATEMENT OF POLICY FOR HEALTH AND SAFETY AT WORK

Earth Environmental & Geotechnical Ltd (EEG) is committed to the protection from accidental loss to its operators and property. In fulfilling this commitment it will provide and maintain a healthy and safe working environment in accordance with the Association of Geotechnical Specialist, Safety Awareness Manual and in compliance with legislative requirements.

The company will strive to eliminate any foreseeable hazards which may result in fire, security losses, damage to property, personal injury or ill-health. UK law, associated Codes of Practice & Advanced Investigation Systems health & safety standards will form the minimum acceptable level of compliance. Adequate resources will be allocated in order to fulfil the requirements of the Construction (Design & Management) Regulations 2007 for the designations of Principal Contractor or Sub-Contractor where appropriate. Other guidance including site specific information and best industry practice will also be used in order to define site standards.

Accidental loss can be controlled through good management in combination with active operator involvement. To secure this, the management will ensure that safety is fully considered in the concept, design, operation and maintenance of facilities and equipment.

All operators will be provided with appropriate training and supervision to enable them to perform their work in accordance with the established operating philosophy and procedures.

This policy will be reviewed and updated as necessary and, in any case, not less than annually.
